

# CareerCraft AI - Cover Letter Generator Guide

## 1. Introduction

A well-crafted cover letter enhances job applications by providing a personalized introduction to hiring managers. CareerCraft AI's Cover Letter Generator helps users create compelling, professional cover letters that align with job descriptions.

## 2. How the Cover Letter Generator Works

CareerCraft AI uses **natural language processing (NLP)** and **resume-job description matching** to generate tailored cover letters. The process includes:

- **Job Role Analysis:** Identifies key qualifications required for the role.
- **Personalization:** Incorporates user-specific experience, achievements, and career goals.
- **ATS-Friendly Formatting:** Ensures the cover letter is readable by Applicant Tracking Systems.
- **Tone & Style Adjustments:** Users can choose between **formal, professional, or conversational** tones.

## 3. Steps to Generate a Cover Letter

### Step 1: Select a Job Role

- Users enter the job title and company name.
- CareerCraft AI pulls relevant keywords from the job description.

### Step 2: Input Key Details

- Users provide:
  - Name & Contact Info
  - Work Experience Highlights
  - Relevant Skills & Certifications
  - Career Goals & Interests

### Step 3: AI-Generated Draft & Edits

- The AI generates a **customized** cover letter.
- Users can edit content for **tone, length, and personalization**.

### Step 4: Download & Export

- Cover letters are available in **PDF, Word, or plain text** formats.
- Users can save multiple versions for different job applications.

## 4. Cover Letter Structure & Best Practices

CareerCraft AI follows a structured format:

- **Header:** Name, contact details, date, employer details.
- **Opening Paragraph:** Expresses enthusiasm for the role.
- **Body Paragraphs:** Highlights relevant skills, achievements, and experience.
- **Closing Paragraph:** Reinforces interest and includes a call-to-action.
- **Signature:** Professional closing with name.

### Best Practices:

- ✓ Use **job-specific keywords** to pass ATS filters.
- ✓ Keep it **one page long** (250-400 words).
- ✓ Show **enthusiasm and motivation** for the role.
- ✓ Avoid generic phrases like "I am a hard worker."

## 5. FAQs & Common Customer Queries

### Q1: How long should my cover letter be?

A: Ideally, between 250-400 words (one page max).

### Q2: Can CareerCraft AI customize my cover letter for different job applications?

A: Yes! The AI adjusts content based on the job description provided.

### **Q3: Does CareerCraft AI support different writing styles?**

**A:** Yes, users can choose between **formal, professional, and conversational** tones.

### **Q4: Can I edit the AI-generated cover letter?**

**A:** Absolutely! Users can make manual adjustments before downloading.

### **Q5: Will my cover letter be ATS-friendly?**

**A:** Yes, CareerCraft AI ensures ATS compatibility with proper formatting and keyword usage.
